

MUIR TABLES

worden.

A close-up photograph of a wooden desk leg and frame. The image shows a thick, light-colored wooden beam (likely oak) running horizontally across the top. Below it, a vertical wooden leg is visible, and a horizontal crossbar connects the legs. The background is a soft, out-of-focus grey-blue. The lighting is even, highlighting the natural wood grain.

MUIR - Height-adjustable desking and group tables, based on the seamless integration of refined wood design and precision engineering. Pneumatic counterbalanced system needs no power, and quietly adjusts from sitting to standing height in a second (literally). Available fixed-height desking and tables in seated, counter, and standing heights. Optional in-surface or clamp-on power. Solid wood legs and engineered steel frame, top in wood veneer or laminate.
